Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 19 is rejected under 35 U.S.C. 102(b) as being anticipated by Bednarek et al. (US 6120500). Bednarek et al. disclose an ablation catheter comprising a catheter shaft, the shaft comprising a proximal portion, a distal portion, the distal portion comprising an outer peripheral wall having an active region, wherein the distal portion has a cross-sectional configuration along the active region and the cross-sectional configuration is adapted to bias the active region against the tissue to be ablated.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 5-9, 11, 12, 14/12 and 15-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bednarek et al. (US 6120500) further in view of Takahashi et al. (US 6231585). Bednarek et al. teach all of the limitations of the claims except the cross-sectional configuration including a flattened outer peripheral wall and the dimensions of the aspect ratio as claimed.

Takahashi et al. disclose a catheter and teach that it is old and well known in the art to provide a catheter with a cross-sectional perimeter of various shapes including a

flattened outer peripheral wall to stabilize the device within the treatment location.

Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to construct the Bednarek et al. catheter such that its cross-sectional perimeter includes a flattened outer peripheral to stabilize the device within the treatment area as taught by Takahashi et al.

Furthermore, it would have been obvious to construct the cross-section of the catheter according to the aspect ratio as claimed, since it has been held that discovering the optimum size involves only routine skill in the art.

Response to Arguments

Applicant's arguments with respect to claims 1, 5-9, 11, 12, 14/12 and 15-19 have been considered but are moot in view of the new ground(s) of rejection.
